

How to Create a Discussion Board

You can add discussion board forums to a content area or folder and link the forum to the **Discussion Board** area.

How to Create a Discussion

1. You have two options to create a **Discussion Board**. Option 1 is to select **Discussions on the action bar** or you have the option to click the + sign in the **Content Area, Create, and under Participation and Engagement** choose **Discussion**.

2. On the create **Discussion** page, complete the discussion information, availability, and settings, and then click **Save**. The settings control will appear once the **Discussion Board** question is saved.
3. The **Discussion Board** entry will create a link in the **Content Area** to be placed as an individual item there or within a folder. These DB entries can be graded and applied to the gradebook.
4. The following image shows some of the DB setting changes available.
