Blackboard Course Activity Reports
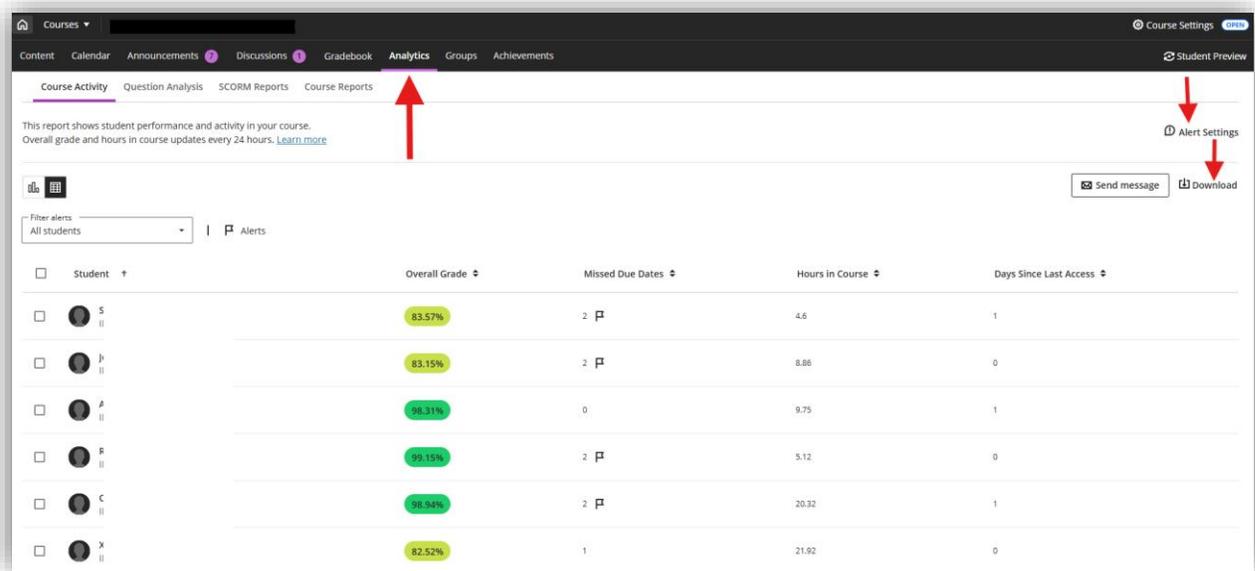

These reports can help you understand how well your students are performing and how much they are interacting with your course.

Select the **Analytics** tab within your course to view a table of the Course Activity that includes Student Overall Grades, Missed Due Dates, Hours in Course, and Days Since Last Access.
You may select the **Download** button to download the table as a CSV.

You can also select **Alert Settings** to open the alert settings panel and choose if you want to be notified when a student's overall grade is below or equal to a certain percentage, if a student's number of missed due dates is above or equal to a certain amount, if a student's days since last access are above or equal to a certain amount.

Select a **student name** on the table to bring up the Student Overview to view additional information, grades, progress, and more related to that student.
